

The windscreen cutting box is an easy to use and practical tool designed to be operated by a single technician. The operation is effortless and even more quick and efficient when combined with an electrical screw-gun (not included). Using a nylon rope makes it safe for both the operator and the vehicle.

AN EFFICIENT TOOL...

- Quick and easy to use by an operator on his own (≈ 1h).
- One roll of nylon rope with a length of 65 m allowing it to fit windscreens of any size.

...REQUIRE LITTLE EFFORTS

- Winding the rope when cutting the seal holding the windscreen in place is done using an electrical screw-gun (not included).

The windscreen cutting kit contains:

- A T-handle
- 1 roll of nylon cutting cord (65 m)
- A suction cup puller
- A bit holder and fixing hook
- A cutter
- A flexible extension
- A cord mounting spatula
- An angle deflector

A CLEAN CUTTING SYSTEM...

- The nylon cutting rope offers a clean cutting solution and avoids to damage the surface of the vehicle body (paint, trims).
- It is not necessary to remove the interior fittings.
- Very practical, the nylon rope fits perfectly the shape of the vehicle and is ideal aluminium car body (no corrosion on contact).

...AND IS SECURE FOR THE OPERATOR

- The flexibility of the nylon rope is safer for the operator than a metal wire. The risk of hand injuries is lower.
