

Ref. 060777

Easy to use, the hot air gun provides a heating power of up to 550°C. Powered by a propane cartridge allowing operation in any position, it can be used at any point in the workshop in a completely autonomous way. The ignition is activated by a piezoelectric button. The hot parts are protected by a spring. An integrated holder allows the device to be used hands-free.

- No flame
- Adjustable air temperature between 450~550°C
- Operation in all positions
- Ideal for:
 - heat up
 - shape
 - detach
 - dry out
 - strip
 - defrost
 - unblock
 - thermoretracter
- Connexion standard 7/16"

Power consumption

0.56 Kw

Max. gas flow rate

35 g/h
