

ORBITAL SANDER (PNEUMATIC) - GYS (Ø 150mm / Ex : 5 mm)

Ref. 087897

The pneumatic orbital sander is equipped with a high-precision motor, which delivers optimal sanding performance for even the most demanding applications, and provides super-stable sanding power, even at high pressure. With its efficient suction system, it can reduce dust levels by up to 60 per cent, for a cleaner working environment. Its low centre of gravity design and finely balanced surface result in a comfortable grip and exceptional usability, ideal for prolonged usage.

ADVANTAGES

- The sander delivers high sanding power without any reverse rotation, even if the pressure exceeds 30 kg.
- Suction efficiency can reach 60%, significantly reducing the amount of dust emitted while you work.
- Powerful, lightweight and perfectly balanced, designed for performance and durability in workshop environments.

SUPPLIED WITH:

- Pneumatic orbital sander
- Quick-release coupling
- Pre-mounted Ø 150 mm surface
- Servicing spanner
