

The CO2 gas heater, professional quality and made from 100% brass, prevents freezing and malfunctioning of gas regulators used with carbon dioxide (CO2) gas. The enclosed heating element ensures that the gas flow remains consistent, to keep your welding unit running at peak performance.

**Made of brass** for superior corrosion resistance in humid environments

#### Specifications

Gas compatibility	CO2
Supply voltage	220 V
Mains cable length	1.5 m
Heating power	125 W
Pressure	200 bars
Weight	1.25 kg
