

The GYSDUST EXTRACTOR PRO 2 is a unique pneumatic vacuum extraction system designed for the removal of sanding dust in automotive repair workshops. With dual connection ports, you can connect either two sanders, or a sander and a vacuum block, for greater versatility in the workplace. The patented GYS automatic cleaning system removes any need for manual maintenance. Fully ATEX certified, it is also suitable for sanding aluminium bodywork.

Two independent connection points:

Save time and increase efficiency by connecting two tools simultaneously for greater efficiency.

Supplied without sander or block.

Supplied with a collection bag.

Side storage compartments x2:

Additional storage space for cleaning spray and sanding discs.

Manual or AUTO position, patented automatic start system.

i AUTO mode only works with a motorised tool (sander). Each lever is independent.

Large 20L storage capacity: Carry and store up to 10 boxes of sanding discs.

Supplied with two hoses, 4 metres - ø 29 mm.

Ergonomic twisted earth cable, 2.5m. For ground connection (ATEX requirement).

Automatic maintenance: No maintenance required, with a patented automatic cleaning system on the suction unit.

Regulator

Compressed air connection for blow-guns, air-powered screwdrivers, etc.

ATEX Category Group II — Category 3
