

Ultra-compact and powerful, the Nomad Power Air 502 has all the essential functions needed when unexpected situations arise. Starting, inflating, charging, and lighting: a single device for everything, efficiently and safely.

START YOUR VEHICLE SAFELY

Its high-performance lithium battery offers exceptional power-to-size ratio. It delivers up to 500 A to provide instant starting power to vehicles equipped with a 12-volt lead-acid battery — whether wet, gel, AGM, or Start&Stop — ranging from 5 to **90 Ah**: motorcycle, ATV, car, SUV, etc.

The smart jumper cables help protect the battery and electronic equipment in your vehicle:

- short-circuit protection;
- overcurrent protection;
- reverse polarity protection;
- protection against excessive starting currents.

INFLATE FASTER AND MORE EFFICIENTLY

The built-in compressor is driven by a 22 mm cylinder pump, offering both performance and reliability. This allows for a high flow rate of 28 l/min:

- faster inflation;
- more stable performance and lower risk of overheating;
- superior durability.

The Nomad Power Air 502 delivers up to 10 bar (150 psi) to suit a wide range of applications. You can set the required pressure or simply use one of the 4 preset modes: car, motorbike, bicycle, ball. The compressor switches off automatically once the target pressure is reached, offering both accuracy and safety.

STAY CONNECTED ON THE MOVE

You can use the Nomad Power Air 502 as a power bank to charge your devices.

- **USB-A and USB-C ports;**
- 3 Ah capacity;
- ideal for smartphones, tablets, sat-navs...

SEE AND BE SEEN AT ALL TIMES

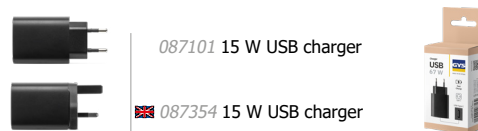

The integrated LED light has 3 modes: standard, flashing, and SOS settings. Ideal for emergencies or night-time call-outs.

Supplied with accessories:
